

Digital Product Designer - UX/UI (f/m/d) at BSDEX GmbH

Location: Berlin or Stuttgart

About Boerse Stuttgart Digital Exchange GmbH

We are Boerse Stuttgart Digital Exchange GmbH – we are building Germany’s first regulated trading venue for digital assets. Bitcoin has disrupted the conventional banking and Stock exchange business and generated billions in value in shortest possible time. The underlying blockchain technology is revolutionizing the handling of assets along the value chain of the financial world.

We set high standards in transparency and security and offer a reliable framework for trading. In order to realize this ambitious endeavor, we are looking for new colleagues (f/m/d), who are willing to take on responsibility, who bring in a good portion of pioneering spirit and courage to accompany us on this path.

Your role:

- You build great products and “wow-effect” features that every user love
- You create the UX and service design for our digital products, from scratch to go-live and beyond by using a variety of research and design methods
- You will be a driving force behind our user-centric, hypothesis-driven product development and closely collaborate with our product owners
- You develop blueprints, user journeys, wireframes and create prototypes
- You analyse user data, conduct usability tests and transfer outcomes to concrete product improvements to create the best user experience
- You contribute actively to the product vision, product strategy and product roadmap and you create and implement a process for arriving at a shared product vision/strategy/roadmap
- You keep an active eye on where the market is heading while using those insights for Boerse Stuttgart’s product strategy

What you bring:

- You are an experienced digital product designer with a passion for both, UX and UI, and ideally you have created a B2C platform-products
- Ideally you have work experience within the Fintech/Insurtech industry or other highly regulated environments
- You are extremely analytical, understand research methods in depths and know how to translate research findings into products and features
- You have a strong routine in using Sketch and prototyping tools
- You are data driven – when it matters
- You're familiar with a remote work setup and know well how to communicate
- You actively contribute to a healthy team culture based on mutual trust and support and you are fun to work with :-)
- You are okay with some travel activity to Berlin and Stuttgart (we give our best to establish a great remote collaboration culture that avoids too many trips and minimizes our carbon footprint for the whole company)

We offer:

- Participation and ownership in building the missing piece of infrastructure in Europe to trade digital assets
- Access to resources and colleagues of Boerse Stuttgart and knowledge exchange / collaboration with other digitization projects within Boerse Stuttgart, namely Primary Market / Tokenization, Custody, BISON
- Become a shaper of our company culture
- We will have further perks here in the future ...

Sounds good? Please send us your CV/LinkedIn/Github (no need for a cover/motivation letter) to jobs@bsdex.de and we will get back to you in no time!
