

# DevOps Engineer / Security (f/m/d) Remote at BSDEX GmbH

Location: Berlin or Stuttgart or 100% remote in Germany

**You don't live in Berlin? No worries, we live and breathe a remote culture**

## About

We are Boerse Stuttgart Digital Exchange GmbH – we are building Germany's first regulated trading venue for digital assets. We set high standards in transparency and security and offer a reliable framework for trading. In order to realize this ambitious endeavor, we are looking for new colleagues (f/m/d), who are willing to take on responsibility, who bring in a good portion of pioneering spirit and courage to accompany us on this path.

## Mission

Börse Stuttgart Digital Exchange offers retail and institutional clients a trusted and reliable way to trade and store digital assets.

## Your Role

- Collaborate closely with your technical stakeholders from Börse Stuttgart to ensure a smooth, reliable, and secure running of our platform
- Bring in your ideas and thoughts on technical problems to find best in class solutions and further develop our "devops-culture"
- Support our various product/engineering teams and setup for deployments, interacting closely with our frontend and backend engineers on topics of security, scalability and infrastructure Monitor, evaluate and decide on new technologies to be added to our tech stack
- Implement protective measures and security concepts
- Optimize and implement existing and future processes in line with the requirements of security and compliance Plan and execute regular security testing together with developers
- Provide guidance and support for the teams when implementing features and bug fixes
- Provide support with incident response and reporting

## Your Skill set

- 3+ years of total experience as a DevOps Engineer in security field
- Hands-on experience with application and cloud security
- Experience in writing tools, automating tasks
- Experience with automation and CI/CD in regulated environments
- Experience with AWS, Terraform, Cloudflare, and Kubernetes
- Experience in working with multiple teams and different technology stacks
- Built and deployed custom security tooling
- Ideally you have already worked in highly regulated industries/contexts such as the financial industry (i.e. banking, trading, fintech, token economy)

## Benefits

- Competitive salary
- Stability through corporate back-up and lots of growth opportunities
- 100% flexibility: work from where you want, when you want
- State-of-the-art tech environment
- Learning and Development budget (500 € annually)
- 30 days of vacation

Sounds good? Barbara looks forward to your profile (e.g. CV/LinkedIn/GitHub - no need for a cover letter) under [jobs@bsdex.de](mailto:jobs@bsdex.de) and will get back to you within 72 hours!
