

# Senior Engineer – Trading Systems (f/m/d) at BSDEX GmbH

Location: Berlin or Stuttgart

## About Boerse Stuttgart Digital Exchange GmbH

We are Boerse Stuttgart Digital Exchange GmbH – we are building Germany's first regulated trading venue for digital assets. Bitcoin has disrupted the conventional banking and Stock exchange business and generated billions in value in shortest possible time. The underlying blockchain technology is revolutionizing the handling of assets along the value chain of the financial world.

We set high standards in transparency and security and offer a reliable framework for trading. In order to realize this ambitious endeavor, we are looking for new colleagues (f/m/d), who are willing to take on responsibility, who bring in a good portion of pioneering spirit and courage to accompany us on this path.

## Your role:

- You take ownership for building and further developing our engineering culture in close collaboration with our MD/CTO
- You take responsibility for architecture and technical design of our trading system
- You are consulting all teams with your strong technical expertise
- You setup our systems, processes and tools in a way that those are equipped to scale in a growing userbase context
- You take technology and tooling decisions and ensure a smooth implementation and running of your systems
- You actively contribute to our technology strategy and take appropriate actions and initiatives to execute this strategy with your area of responsibility
- You connect and collaborate with all relevant stakeholders and external parties which are essential elements in building our digital products
- You continuously educate the organisation about the context and impact of our engineering initiatives to foster high commitment and engagement

## What you bring:

- You are an experienced technology lead with solid work experience in regulated industries
- You are a passionate Golang developer and have a strong knowledge base in DevOps
- You have a deep understanding of trading, trading systems and algorithms and have a strong passion to develop those further
- You have a strong expertise in building high scale and low latency systems and APIs
- You are passionate about people and new work philosophies – ideally you have experience in working with location-independent teams
- You are experienced in building processes and organisational structures to support highly effective and scaling teams
- You actively shape and contribute to a healthy team culture based on mutual trust and support and you are fun to work with :-)

## We offer:

- Participation and ownership in building the missing piece of infrastructure in Europe to trade digital assets
- Access to resources and colleagues of Boerse Stuttgart and knowledge exchange / collaboration with other digitization projects within Boerse Stuttgart, namely Primary Market / Tokenization, Custody, BISON
- Become a shaper of our company culture
- We will have further perks here in the future ...

Sounds good? Please send us your CV/LinkedIn/Github (no need for a cover/motivation letter) to [jobs@bsdex.de](mailto:jobs@bsdex.de) and we will get back to you in no time!
